EU Funding Goals*

What would you like to learn from your new European partnerships? What skills and competencies would you like to develop?

Consider breaking down your plans into goals of 2 years, 5 years and 10 years.

For example, if you are new to EU projects, perhaps in the first two years you want to focus on building a network, learning, and participating as a partner in projects. Be specific about the topics you are interested in! This will help potential partners know if they should reach out to you.

In five years, could focus on larger projects with specific outputs and coordinating your own projects.

Ten years down the line, you might be looking at coordinating multiple projects with higher level outputs and results.

Strengths*

What are you really good at? What can others learn from you and what do you have to offer in an EU funded project? E.g. access to a specific group, expertise in a specific area, organisational capacity, a great network of volunteers...anything that could add value to a project!
